

8th November 2019
AULA Messieri

“Rare Is Common: Hereditary Traits and Diseases in Animals: Precise Diagnosis and Management”

Prof. Urs Giger, Dr. med. vet., MS FVH, Dipl. ACVIM & ECVIM, Dipl. ECVCP, University of Pennsylvania

Prof. Cord Drögemüller, Dr. med. vet., University of Bern

14:30 - 15:30

Hereditary Diseases and Genetic Predispositions in Dogs and Cats. Part I - Prof. Giger

15:30 - 16:30

Hereditary Diseases and Genetic Predispositions in Dogs and Cats. Part II - Prof. Giger

15:30 - 16:30

Coffee break

17:00 - 17:40

Germline genetic variation is a quite frequent causal factor in rare diseases in domestic animals - Prof. Drögemüller

17:40 - 18:20

Short-read whole genome sequencing is the current gold standard in precision medicine, not only in dogs - Prof. Drögemüller

18:20 - 19:00

Precision animal breeding by exploiting massive genome-wide genotyping and sequencing data of cattle - Prof. Drögemüller
